## Who are we?

**NEWTON LABORATORIES, INC.** was established in 1987 and is located in Conyers, GA, a suburb of Atlanta. Its foundation is built upon the expertise of Dr. Luc Chaltin, a Belgian-born homeopathic practitioner for nearly 50 years and a leader in the field of clinical homeopathy.

**NEWTON** is a FDA-registered homeopathic manufacturing facility and prepares all of its homeopathic remedies in strict accordance with the Homeopathic Pharmacopoeia of the United States (HPUS). All of our complexes and single remedies are made by hand, using only certified gluten-free, non-GMO, organic cane alcohol and the highest quality herbs and medicinal substances.

**NEWTON** is a member of the Natural Products Association, the American Association of Homeopathic Pharmacists and the American Pet Products Manufacturers Association.

### Our Founder ~ Dr. Luc Chaltin

In 1965, Belgian-born Luc Chaltin was gravely ill with tuberculosis. He could not tolerate the treatment attempted by traditional medical doctors, and a well-respected classical homeopath told him that homeopathy could not cure tuberculosis. This life-threatening experience led him on his journey.

As fate would have it, his search led him to a book that explained the importance of liver drainage, more commonly known as detoxification. He knew he had found his answer. Dr. Luc began using homeopathic remedies known to cleanse or "drain" the liver of toxins. As he continued his quest for health, he began to experiment by combining homeopathic liver "drainers" with homeopathic remedies known to support excretory function. He soon developed a combination formula and labeled it "**Drainer.**" His condition quickly improved. Within six months, there was no evidence of tuberculosis.

In 1987, Dr. Luc founded Newton Laboratories, Inc. and began to market an over-the-counter version of his "**Drainer**" as **NEWTON's Detoxifier**. He introduced **Detoxifier**, along with other unique formulations, to health food stores, holistic practitioners and retail customers. His formulations focus on the liver and kidneys while addressing symptoms of acute and chronic illness. The theory of detoxification for overcoming toxic, chronic afflictions remains at the forefront of holistic healing methods today. All **NEWTON** complexes continue to be developed using his unique methods.

To aid in the promotion of homeopathy and the education of others, Dr. Luc established the **American Academy of Clinical Homeopathy (AACH)**. Hundreds of health food store personnel and lay people have completed the **AACH Certification in Basic Homeopathic Principles**, and have gone on to promote healing through clinical homeopathic methods. Today, the **AACH** has a staff of educators, support personnel and graduates who are embracing and continuing Dr. Luc's vision for educating the masses in this valuable healing method.

## Why Choose NEWTON?

### Expertise & Experience

The not-so-secret ingredient that places **NEWTON** above all others lies in the history and formulation of its complexes by world-renowned authority, Dr. Luc Chaltin. His 40+ years of clinical experience and research made him unparalleled in his ability to develop effective complex remedies. Choosing the most effective blend of remedies among the thousands of potential combinations is an art that comes only with a passion and gift for healing and many years of study and experience. His legacy and expertise continue today through the dedicated and well-trained **NEWTON** staff.

### Quality & Safety

Dr. Luc structured **NEWTON** Homeopathics around the philosophy of quality. When he built the lab, it was on property where he could drill a well for pure water rather than use city water. **NEWTON** continues to use this private-well water today which undergoes advanced filtration resulting in purified water. **NEWTON** uses organic or wild-grown herbal tinctures, certified organic, gluten-free, non-GMO cane alcohol and 100% gluten-free, non-GMO, beet-derived sucrose pellets. **NEWTON** packages only in glass (excluding large-size veterinarian products) to avoid potential interaction between the homeopathic remedies and plastic. All raw materials and finished products are tested by a FDA-registered independent laboratory according to HPUS (Homeopathic Pharmacopoeia of the United States) guidelines ([www.HPUS.com](http://www.HPUS.com)).

### Environmental Awareness

Dr. Luc was an advocate for the environment before **NEWTON** was established in 1987. In 1972, he wrote the first book in the Dutch language on organic gardening. He also hosted a radio show in his home country of Belgium on organic gardening. **NEWTON** has recycled and used organic before they were marketing tools. **NEWTON** was **GREEN** when green was just a color. **NEWTON** decreases its impact on the environment through minimal retail packaging which also allows more product choices to be offered on less shelf space. Only biodegradable, recycled or recyclable materials are used in the shipping department. In addition, **NEWTON** extends its environmental awareness through an in-house recycling program, earth-friendly, toxin-free pest management and full-spectrum lighting. Honoring the energetic component of homeopathy, **NEWTON** incorporates Feng shui principles throughout its facility.

### Variety & Selection

**NEWTON** manufactures over-the-counter (OTC) and healthcare professionals-only (**PRO**) single remedies and complexes; most are available in liquid and pellet form. **NEWTON** offers over 100 OTC complexes and over 80 **PRO** complexes for adults, children and pets.

### Economical & Efficient

Homeopathy is much less expensive than other therapies and pharmaceutical drugs, and is exempt from carrying an expiration date. Because homeopathy is safe, routine laboratory tests are not required (as with many pharmaceuticals) to monitor detrimental effects on the liver, kidneys and blood. Compare labels carefully. Some brands recommend a dosage more than double **NEWTON's** standard 3 to 6 drops or pellets dosage. This means that even though **NEWTON** may be priced higher than a competitor, the product will last much longer if taken as recommended.

### Easy to Use

When you consider the hundreds of single remedies available, it can be very confusing knowing where to begin. **NEWTON** has simplified the process by combining the most appropriate remedies for you. Complexes are named in such a manner that choosing the correct complex is easy. Although liquids are packaged with a glass dropper for ease of administration, plastic droppers and spray tops are also available for a minimal charge. We believe complexes are the quickest, easiest way for comprehensive homeopathic care of conditions.

### Customer Support

Although **NEWTON** is unable to serve as your healthcare professional or give medical advice, **NEWTON's** support personnel are available to assist with any questions pertaining to **NEWTON's** products.

### Handmade in the USA

**NEWTON** has been based in the State of Georgia since its inception. **NEWTON** products are handmade by a staff of professionals according to approved homeopathic standards. People, not machines, make **NEWTON** remedies right here, in the United States of America.
