Helpful Hints & Tips

Detox daily!

A daily dose of NEWTON's *Detoxifier* focuses on the liver and excretory systems. A "clean" body will maximize the effectiveness of other remedies, supplements and vitamins.

Wait for it!

Wait 15 minutes between taking homeopathy and eating, drinking or taking drugs, supplements or other natural remedies. This gives the homeopathy time to reach its maximum effectiveness without interference.

Drop it in!

Liquid remedies should be placed directly in the mouth or dropped into a small amount of water. As the remedy contacts the mucous membranes of the mouth, it is absorbed into the body.

Cross it over!

Although NEWTON manufactures complexes specifically for Pets, a condition may arise for which there is no prepared Pets complex. All products manufactured by NEWTON may safely be used for adults, children or pets; adjust the dosage according to directions. If a pet is experiencing vaccination-related symptoms, consider using NEWTON's *Vaccination~Illness Assist, Kids*. If a pet is experiencing constipation, use NEWTON's *Constipation* from adult or Kids product line.

Mix it up!

If an alcohol-free remedy is preferred, place the drops of homeopathy in a small amount of warm water and let stand for 10 minutes to allow the alcohol to evaporate prior to dosing. The FDA mandates that liquid homeopathics contain a preservative; NEWTON's choice of preservative is USP gluten-free, non-GMO, organic cane alcohol. NEWTON's gluten-free, non-GMO, beet-derived sucrose pellets are another alcohol-free alternative.

Keep it safe!

NEWTON's amber glass containers (an inert material) protect the homeopathics from light exposure and prevent any interaction with the homeopathics.
