

## OUR FOUNDER ~ DR. LUC CHALTIN (1923 - 2008)

In 1965, Belgian-born Luc Chaltin was gravely ill with tuberculosis. He could not tolerate the treatment attempted by traditional medical doctors. A classical homeopath treated him without success and another well-respected classical homeopath told him that homeopathy could not cure tuberculosis. This life-threatening experience led him on his journey.

As fate would have it, his search led him to a book that explained the importance of liver drainage, more commonly known as detoxification. He knew he had found his answer. Dr. Luc began using homeopathic remedies known to cleanse or "drain" the liver of toxins. As he continued his quest for health, he began to experiment by combining homeopathic liver "drainers" with homeopathic remedies known to support excretory function. He soon developed a combination formula and labeled it "**Drainer**." His condition quickly improved. Within six months, there was no evidence of tuberculosis.

Determined to continue his research and share his discovery with others, Dr. Luc sought additional learning opportunities. He earned a homeopathic diploma from the British Institute of Homeopathy and a degree in Naturopathy. He began to teach homeopathy, lecture,

write books and publish articles for scientific journals. He firmly believed in educating others and "paying it forward". During his career in natural health, Dr. Luc assisted in the healing of thousands of people throughout the United States, Europe and the Caribbean.

In 1987, Dr. Luc founded Newton Laboratories, Inc. and began to market an over-the-counter version of his "**Drainer**" as **NEWTON's Detoxifier**. He introduced **Detoxifier**, along with other unique formulations, to health food stores, holistic practitioners and retail customers. His formulations focus on homeopathic drainage while addressing symptoms of acute and chronic illness. The theory of detoxification for toxic, chronic afflictions remains at the forefront of holistic healing methods today. All **NEWTON** complexes continue to be developed using his unique methods.

At Amsterdam's 1992 International Conference on AIDS, one of Dr. Luc's papers on "auto-immune" diseases was presented by noted scientific author, Christopher Bird. In 1993, Dr. Luc served on a special committee established to review grant applications for the Office of Alternative Medicine at the National Institutes of Health (NIH). He was invited to participate due to his "...knowledge of alternative medicine and [his] ability to bring rigorous scientific standards to the review of these types of applications."

To aid in the promotion of homeopathy and the education of others, Dr. Luc established **The American Academy of Clinical Homeopathy (AACH)**. Hundreds of health food store personnel and lay people have completed the **AACH Certification in Basic Principles of Homeopathy**. Many have completed its **Clinical Homeopathy Correspondence Course** and have gone on to promote healing through clinical homeopathic methods. Today, the **AACH** has a staff of educators, support personnel and graduates who are embracing and continuing Dr. Luc's vision for educating the masses in this valuable healing method.

In 2017, the **AACH** published a book entitled **Healing with Clinical Homeopathy, the Life, Vision, Genius and Legacy of Dr. Luc Chaltin**. It is not only a fascinating biography of Dr. Luc's life, but also examines the development of his clinical philosophy and methods. Learn how you too can address acute or chronic conditions utilizing his methods. Find it on Amazon, ask for it at your favorite healthfood store or order online at [newtonlabs.net](http://newtonlabs.net). Ebook and interactive versions are also available. The interactive version contains a video of Luc lecturing, audios of family and admirers and many historical pictures not contained in the print version.
