

Single Remedy Tips & Tidbits

What are Single Remedies?

Each homeopathic single remedy has one active ingredient, commonly referred to by its Latin name and sourced from plants, animals or minerals. For example, Cimicifuga racemosa is a remedy made from the Black cohosh plant, Apis mellifica is made from the honey bee and Sulphur is a mineral used in homeopathic form.

I thought NEWTON only manufactured combination remedies.

Although NEWTON specializes in, and is best known for its extensive selection of complexes, NEWTON also manufactures the most popular single remedies in a variety of potencies and packaging.

How can I find NEWTON complexes that contain Arnica?

You can find which NEWTON complexes contain a particular single remedy by entering the remedy in the search box at newtonlabs.net. For a more comprehensive and integrative approach, consider utilizing a complex for your particular healthcare need.

How do I take a single remedy?

Waiting 15 minutes between taking homeopathy and eating, drinking, taking drugs, supplements or other remedies may decrease interference with the homeopathics.

Quality Assurance

NEWTON is an FDA-registered homeopathic manufacturer and prepares its remedies according to the Homeopathic Pharmacopoeia of the United States (HPUS). Dr. Luc structured NEWTON around the philosophy of quality. All raw materials and finished products are tested by an FDA-registered independent laboratory. NEWTON uses certified gluten-free, non-GMO, organic cane alcohol as a preservative. The pellet version uses certified gluten-free, non-GMO, organic beet-derived sucrose (lactose-free) pellets. Because glass is inert, NEWTON packages only in amber glass (excluding large-size veterinarian products and topicals) that does not interact with and protects the homeopathics from light.

For self-limiting conditions not requiring the guidance of a health professional, NEWTON offers over 100 combination remedies for your entire family and pets.

Welcome to Homeopathy

Homeopathy, a complete system of healing with its own method of diagnosing and its own special remedies, was developed by Dr. Samuel Hahnemann over 200 years ago. Homeopathics have no known harmful side effects, may be used by everyone, including pets, and can be administered for both acute and chronic conditions.

Homeopathics are made from small amounts of plant, animal and mineral substances prepared by a process whereby a minute amount of substance is highly diluted and succussed (vigorously shaken). Scientists have theorized that homeopathy may function similar to the way enzymes or hormones function in the body. Although they are found in similar minuscule amounts, they are believed to have very powerful effects.

People are returning to homeopathy because they understand that in order to achieve health, one must discover the root cause of disease and not just treat the symptoms. Many understand that pharmaceutical drugs often interfere with the body's natural ability to heal itself. Suppressing, or merely removing symptoms, is a temporary solution. Addressing the whole person naturally is the long-term solution to modern states of disease. We believe this is the role of homeopathy.

NEWTON complexes are the result of advanced evolution in the use of homeopathic remedies in Europe, especially in Belgium, France and Germany. Starting in the mid-1800s, through the beginning of the 20th century, the French homeopaths developed the technique of draining toxins from the body. Dr. Luc took this idea and combined it with the concept of complex remedies. The use of such a complex saved his life and led to the development of the wide range of NEWTON complexes.
